

HANetf Brings Global Innovation and Cloud Computing ETFs to Europe

- *Multi-Billion Dollar GinsGlobal Index Funds joins forces with HANetf for ETF debut*
 - *HAN-GINS Global Innovative Technology UCITS ETF (ITEK)*
 - *HAN-GINS Global Cloud Technology UCITS ETF (SKYY)*
- *First traditional asset manager and second client to list in Europe via HANetf platform*

London, October 2018 – HANetf, Europe's first independent 'white-label' UCITS ETF platform is delighted to announce that the HAN-GINS Cloud Technology UCITS ETF (SKYY) and HAN-GINS Global Innovative Technologies ETF (ITEK), will launch on London Stock Exchange on 10th October, 2018

EXCHANGE	BLOOMBERG CODE	RIC	ISIN	CURRENCY	SEDOL
ITEK	75 bps TER				
London Stock Exchange	ITEK	ITEK.L	IE00BDDRF700	USD	BYVJ8Y3
London Stock Exchange	ITEP	ITEP.L	IE00BDDRF700	GBP	BYVJ9D9
SKYY	75 bps TER				
London Stock Exchange	SKYY	SKYY.L	IE00BDDRF924	USD	BYVJ8T8
London Stock Exchange	SKYP	SKYP.L	IE00BDDRF924	GBP	BYVJ9B7

The two new ETFs enable investors to gain exposure to companies leading transformative technological and industrial innovation on a global basis. The new ETFs have been developed with GinsGlobal Index Funds, a multi-billion dollar global asset management organisation, as their inaugural European funds and first ETFs.

The HAN-GINS Cloud Technology UCITS ETF (SKYY) tracks the Solactive Cloud Technology Index, an index of leading companies that are active in the field of cloud-based software and services. The fund uses an artificial intelligence process to identify and capture a global cloud technology opportunity set with constituents weighted by market capitalization and capped at 4%. The fund has a TER of 75 bps.

The HAN-GINS Global Innovative Technology UCITS ETF (ITEK) tracks the Solactive Innovative Technologies Index, a diversified, global index of pioneering companies that are poised to create and benefit from tomorrow's industrial revolutions. The fund targets companies involved in Robotics & Automation, Cloud Computing & Big Data, Cyber Security, Future Cars, Genomics, Social Media, Augmented and Virtual Reality and Blockchain, enabling investors to gain exposure to many world-changing, high-growth sectors in a single trade. The fund has TER of 75 bps

With these launches, GinsGlobal becomes the second U.S. asset manager, (following Big Tree Capital's launch of EMQQ earlier this month), and the first institutional asset manager to launch a UCITS ETF through the HANetf platform.

The launch demonstrates barriers to European ETF market entry have been effectively dismantled by HANetf, emulating the approach of the US ETF industry where asset managers using a white label platform to launch ETFs has become commonplace.

Anthony Ginsberg, Founder and Managing Director of GinsGlobal Index Funds said: *"We're delighted to be partnering with the HANetf team on our first European ETF offerings. We believe HANetf's Irish platform is an attractive proposition for many global investors as they have made our transition from mutual funds to ETFs as smooth as possible. Our unique theme-based ETFs focusing on Cloud Computing and Innovative Technologies will provide European investors with easy low-cost access to dynamic global companies representing the Fourth Industrial Revolution. These two ETFs, include leaders in Robotics, Artificial Intelligence, Cyber Security, Social Media, Future Cars, Blockchain, Cloud Computing and Genomics. Investors benefit from Solactive's broad-based indices - including household names from the US, China and Europe, plus many other ground-breaking companies."*

Nik Bienkowski, co-Founder and co-CEO at HANetf, said: *"GinsGlobal has successful and well-established institutional funds in the U.S., and their team identified the opportunity to future-proof their business and extend their distribution via a European ETF offering. These launches demonstrate that the barriers to entry to the European ETF markets have been totally dismantled. No longer do asset managers need a European footprint, or their own ETF infrastructure to benefit from the disruptive distribution power of ETFs. We are delighted to have worked with GinsGlobal to bring these exciting new propositions to European investors."*

HANetf ICAV is an open-ended Irish collective asset management vehicle which is constituted as an umbrella fund with segregated liability between sub-funds and with variable capital organised under the laws of Ireland and authorised by the Central Bank of Ireland ("CBI"). Investors should read the prospectus of HANetf ICAV ("HANetf Prospectus") before investing and should refer to the section of the HANetf Prospectus entitled 'Risk Factors' for further details of risks associated with an investment in the Shares

Risk Factors

CAPITAL AT RISK: ETFs are tracking instruments: Their risk profile is similar to a direct investment in the Underlying Index. Investors' capital is fully at risk and investors may not get back the amount originally invested. **REPLICATION RISK:** The fund objectives might not be reached due to unexpected events on the underlying markets which will impact the index calculation and the efficient fund replication. Physically replicated ETFs may have counterparty risk resulting from the use of a Securities Lending Programme. **UNDERLYING RISK:** The Underlying Index of a HANetf ETF may be complex and volatile. ETFs exposed to Emerging Markets carry a greater risk of potential loss than investment in Developed Markets as they are exposed to a wide range of unpredictable Emerging Market risks.

For professional clients only

CURRENCY RISK: ETFs may be exposed to currency risk if the ETF is denominated in a currency different to that of the Underlying Index they are tracking. This means that exchange rate fluctuations could have a negative or positive effect on returns. LIQUIDITY RISK: Liquidity is provided by registered market-makers on the respective stock exchange where the ETF is listed. On-exchange liquidity may be limited as a result of a suspension in the underlying market represented by the Underlying Index tracked by the ETF; a failure in the systems of one of the relevant stock exchanges, HANetf or other market-maker systems; or an abnormal trading situation or event.
